

Course:**Excel 2013: Basic**

Duration: 1 day**Description:**

This ILT Series course will familiarize students with spreadsheet terminology and the fundamental concepts of Microsoft Excel 2013, including identifying Excel window components, navigating worksheets, and downloading templates. In addition, students will learn the basics of entering and editing text, values, and formulas, and how to save workbooks in the native Excel format, as well as in other formats. They will learn how to move and copy data and formulas, how to determine absolute and relative references, and how to work with ranges, rows, and columns. Students will also learn how to use simple functions, and how to easily apply formatting techniques to worksheet data. They will create and modify charts, and work with graphics. Finally, they will review workbooks for spelling errors, modify page setup, and print worksheets. The Axzo Edition of this course focuses solely on the skills real users need to be productive immediately in Microsoft Excel. We've listened carefully to customer feedback on the content, and redesigned the course to flow better in the classroom. Setup is clean and simple, examples relevant, and extraneous content gone.
