

Course:**Adobe® Dreamweaver® CS3:**

Duration: 3 days**Course Description**

You may want to make information available on the Internet. To achieve this, you need to create a website. In this course, you will design, build, and upload a website using Dreamweaver. You have created basic web pages. You may now need to develop professional-looking websites. In this course, you will use the advanced features of Adobe® Dreamweaver® CS3 to design and develop professional-looking websites.

Course Objective: You will design, build, and upload a website.**Target Student:**

Students who wish to familiarize themselves with the basic techniques used for creating websites using the Adobe Dreamweaver CS3 application. It also provides the fundamental knowledge and techniques needed to advance to more complex Dreamweaver operations for enhancing the functionality of websites.

Prerequisites:

To ensure the successful completion of Adobe Dreamweaver CS3: Level 1, the student should have an understanding of how to use Microsoft Windows 2000 or Windows XP operating systems.

Upon successful completion of this course, students will be able to:

- prepare to use the Dreamweaver environment.
- create a website.
- add design elements to web pages.
- work with links.
- work with frames.
- upload a website.
- work in Code view using the coding features of Dreamweaver.
- format content using style sheets.
- create an effective user-navigation interface.
- work with AP elements to enhance the layout and positioning of elements on a web page.
- automate tasks.
- create forms.
- author a web page using XML-based data.
